

Company Profile

Company History

Tesco Multisales Inc. was established back in 1992, we has been in the plastic product industry in the Philippines for almost two and a half decades. Although primarily in the food packaging industry, We have since manufactured plastic products for many different clients and catered to other industries - from food, medical, industrial, cosmetics, consumer goods to promotional items, and even special projects as the customer requires.

Company Background

We specialize in blow moulding and injection moulding of different types of plastic, ranging from plastic bottles and caps, to specialized parts for industries from custom weaving arms and nylon plastic bolts. We also offer custom mould designs and product development as part of our services.

We can customize the materials used - from food grade to medical grade to industrial grade materials, and even customize the color of the plastic products to your specifications from the basic colors, to the more exotic colors through color matching. Using Materials such as HDPE, LDPE, and PP, to more uncommon materials such as Nylon and PVC.

We also offer custom products for promotional items, to product prototyping and market tests and other projects that have more limited runs.

Unlike other plastic products, what we produce here are built to be used over and over again, even when it's not for its intended use. (oil containers can be reused as water containers). We believe that what we produce is useful and is of superior quality.

Quality Policy

Tesco Multisales Inc. Is committed to produce quality product that will satisfy our customers. We do this by being true to ourselves and our customers, without compromising the quality of materials work and time, placing the necessary processes in ideal positions.

By learning and applying the latest best practices, we strive to be innovative and up to date providing an advantage in the industry.
